Technical Skills

Programming Languages

- C++
- C#
- Java
- Python
- Javascript

Frameworks and Libraries

- Vue
- React
- TailwindCSS
- FastAPI

Cloud and Development Tools

- Unity
- Unreal Engine
- AWS Cloud Services

Design Tools

- Adobe Creative Suite
- Figma
- Blender
- Krita

Hobbies

- Chess
- Tennis
- Ultimate Frisbee

About Me

I am a software and multimedia graduate from the University of Pretoria, where I completed my BIS Information Science degree specializing in Multimedia. I am currently a full-time Honours student in BIS Information Science specializing in Multimedia, and I am actively building experience for work opportunities in development, UX, and digital media.

I have completed the AWS Academy course and I am looking forward to completing my certification exam in the future. My background combines IT, visual arts, and practical university project experience, which has helped me grow into a versatile developer who enjoys solving real problems through thoughtful software.

Current Projects

SAMFMS

A modular fleet management system – My capstone project for COS301.

SAMFS uses microservices to keep the features of SAMFMS in modular plugins. The system features core plugins. Plugins can be added and removed. Each plugin communicates to the core through a message queue and the core communicates with the security and frontend of the system. A driver app and analytics features have been included.

Among the Guilty

A 2D murder mystery game – My capstone project for IMY300

The game is made in Unity. I contributed a major part to the game's design and development. Some of the main mechanics include an extensive dialogue system, clickable clues that players can view in a casefile UI, and a journal system to collect and view information.

Soft Skills

- Leadership
 - I've been elected class representative for at least one module since the start of my tertiary education.
 - Head Library Prefect (Grade 12, Selborne College): Led a small team of student prefects, overseeing library organization, managing efficient book and board game lending and returns, and fostering a positive, supportive team environment.
- Communication
 - I consistently keep team members informed about project tasks and progress
 - When needed, I encourage and support team members to maintain a positive and productive team dynamic.
- Work Ethic
 - I consistently make reliable contributions to projects.
 - I consistently sit at the front of class, actively answering questions, and taking thorough notes when needed.
